

Digidesign PT Preferences

- 1) Most often when you encounter problems with ProTools, your first troubleshooting step is to “Trash Preferences”. These can be found in: Macintosh HD/Users/”Your User”/Library/Preference.
- 2) Make sure that you have quit ProTools and the throw away the 4 following items:
 - a) com.digidesign.protools(HD or LE).plist
 - b) DAE preferences
 - c) DigiSetup.OSX
 - d) ProTools(HD or LE).preferences
- 3) See the picture below for details

- 4) Empty Trash and Relaunch ProTools
